Varmigo® Outdoor Natural Heating

ALL GOOD REASONS TO BUY VARMIGO®

1 FEELING

- **Infrared is a specific kind of light**, invisible to the human eye, but to which we are nevertheless highly sensitive. It is very efficiently absorbed by the body giving a deep warm feeling.
- On a bright sunny day, we can feel perfectly comfortable in just a T-shirt, even though the air temperature may be close to freezing. **Think of the typical après-ski scene, or of a walk in the high mountains.**
- Did you ever realize that with freezing air around, just a t-shirt on and sitting in the sun you can **feel comfortable**?

2 SAFETY

- **No open flames.** Varmigo® does not use any flame, completely eliminating all risks of flammable or toxic gases, explosions. CE conformity, certified by SGS
- **IP 65**, weatherproof.

3 BUDGET

- Compared to traditional Gas heaters **Varmigo® can save you up to € 500 year** a panel based on 500 hours use per year
- **Maintenance-free.** Natural heating panels require no maintenance, because there are no moving parts, no burners, no filters, no fuel lines, and no more replacement needed of quartz tubes.

4 ENVIRONMENT

- **Reducing CO2 emissions.** As Varmigo® heaters are powered by electricity they produce up to 10 times less CO2 than bottled gas. If green electricity is used Varmigo® can be CO2 neutral.
- **Cradle to cradle.** 98% of the materials can be recycled.

5 VARMIGO® EVERYWHERE

- **Mobile, just like you.** Varmigo is also available in a mobile version. Its moveable base brings comfort exactly where you want it.
- **Fits into any type of environment.** With its stylish, discreet appearance, Varmigo blends perfectly into any setting, and is available in a wide range of looks and sizes.

Varmigo® Outdoor Natural Heating® Panels

Varmigo® infrared heaters provide the Natural Heating sensation humans appreciate so much. Enjoy sunny outdoor heat wherever you want, all year long. Varmigo® is the top of-the-range outdoor heater of Energy Products Group. State-of-the art engineering (patent pending) is combined with the best materials available, enabling Varmigo® to outperform any other heater.

Looks do matter. A team of designers from the famous Antwerp School have shaped Varmigo® into the most beautiful outdoor heater in the world, with its slim, elegant profile and distinctive curve.

The professional version with the fire print and the ambient lighting evokes the coziness of a camp fire.

Varmigo® is a true shape shifter, designed to be customized with your company artwork, logo & colors.

Width and length can also be customized : Imagine a street long Varmigo® hanging above the aisles of a Christmas market.

BARS AND RESTAURANTS

As Varmigo® creates a pleasant and comfortable feeling, Varmigo® ensures your audience will enjoy their stay at your premises. The open flames printed on the surface of the panel create a welcoming hearth-and-home ambience..

Varmigo® can be customized according to your needs and become an integral part of your building design.

Compared to gas fired heaters, Varmigo® saves up to sixty percent of your energy bill.

AROUND THE HOUSE

Enjoy your garden - regardless of the season. Varmigo® creates a comfortable and pleasant atmosphere for your patio at any time of year. Enjoy the company of your friends during a long cool summer evening or even on a beautiful winter day

BREWERIES AND BEVERAGE COMPANIES

Varmigo® offers a unique feature to breweries and beverage companies to increase brand awareness. With your logo printed on the surface of the panel, Varmigo® creates direct interaction with your customers at the point of sale, establishing a strong link between the brand and their feeling of comfort and well-being; a positive association which can substantially increase your volume.

Varmigo® panels can be replaced by new logos for seasonal promotions or events.

Natural Heating[©] how it works

Transferring warmth directly ...

Natural infrared heating uses the same principle as the sun to transfer its warmth to our planet. Instead of heating the air that surrounds us – as conventional heating systems do – infrared heating radiates warmth that is absorbed directly by people and objects.

This ensures that the energy is utilized more efficiently. It also creates a pleasant and unique heating experience, very much like feeling the warmth of the sun on your face on a cold winter's day.

... just like the sun
